

Vasudev Siddh

AI & Full-Stack Engineer

India / siddhvasudev1402@gmail.com

siddhvasudev.com / github.com/vasu-devs / linkedin.com/in/vasu-devs

AI engineering intern who builds LLM, voice AI, and full-stack products with Python and TypeScript, from first prototype to tested release. Creator of JustHireMe, an open-source AI job-search app with 2,200+ GitHub stars.

EXPERIENCE

AI Engineering Intern / withlayer.ai

Jun 2026 - Present

- Use Python, TypeScript, React, Next.js, and WebRTC to build real-time voice AI, so users can hold natural, low-delay conversations with an AI assistant.
- Add automated evaluations and regression tests so LLM changes are checked before they reach users; build data-access controls that limit who sees which data.

AI & Full-Stack Engineer (Contract) / Confidential client

2026 - Present

- Use Python, FastAPI, MongoDB, and vector search to build AI search that finds relevant results from both text and images.
- Set up automated tests and CI/CD with Docker and AWS, so every change is tested and deployed the same way.

SELECTED PROJECTS

JustHireMe / Creator / Open source

Tauri / Rust / React / Python / FastAPI

- Built an open-source desktop app with Python, FastAPI, React, and Rust that finds jobs, explains how well each one fits you, and drafts tailored applications; 2,200+ GitHub stars.
- Ranked jobs with graph and vector search plus quality checks, with human review before any generated document is used.

Odeon / Solo build / Agent evaluation

Python / FastAPI / WebSockets / React / SQLite

- Built a tool with Python, FastAPI, and React that tests an AI agent with difficult simulated conversations, has an LLM grade its behavior, and rewrites its prompt until the scores pass.
- Streams each run live with a word-by-word diff of every prompt change, so it is easy to see what changed.

Waldo / Solo build / Multimodal RAG

Python / LangGraph / Docling / Gemini / Qdrant

- Built a chat tool with Python, LangGraph, Gemini, and Qdrant that answers questions about PDFs, including their tables and figures, and shows the source figure with each answer.
- Checks if retrieved content is relevant, retries with a rewritten question, and says it does not know rather than guessing.

TECHNICAL SKILLS

Languages & applications: Python, TypeScript, JavaScript, SQL, React, Next.js, FastAPI, Node.js

AI & data: Machine learning, large language models (LLMs), retrieval-augmented generation (RAG), LangGraph, embeddings, vector search, voice AI, PostgreSQL, MongoDB

Engineering: Docker, AWS, GitHub Actions, CI/CD, automated testing, AI evaluations, Git, REST APIs

EDUCATION & RECOGNITION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Lovely Professional University, Punjab / 2023 - 2027 (expected) / CGPA: 8.59

Smart India Hackathon 2025 semifinalist (PolySEE team). Oracle OCI AI Foundations Associate; NPTEL coursework in Deep Learning and Machine Learning. Open-source contributions to kana-dojo, animated icons, and free-programming-books.
