Vasudev Siddh

AI & Full-Stack Engineer

India / siddhvasudev1402@gmail.com
siddhvasudev.com / github.com/vasu-devs / linkedin.com/in/vasu-devs

AI engineer who builds production voice agents and LLM systems, from prototype to tested release. Creator of JustHireMe (2,249★ open source).

EXPERIENCE

AI Engineering Intern / withlayer.ai

Jun 2026 – Present

- Own agent truthfulness and authorization for a real-time voice AI product: evidence contracts, default-deny access rails, honest failure handling.
- Closed cross-tenant and path-traversal vulnerabilities; made raw-error logging impossible at compile time.
- Built the streaming voice pipeline and a native macOS (Swift) audio and speaker-identification stack, including a windowed-sinc resampler and on-device Vision OCR.
- Governed background execution (leased, recoverable, exactly-once routines) and event-driven preparation; approval-gated CRM write-back.

Founding Engineer (contract) / Confidential client

May 2026 – Present

- Run engineering end to end: AI backend, data platform, AWS operations, CI/CD and iOS releases; review and ship the team's work.
- Rebuilt the AI assistant: first results 72–122 s → under 10 s; keyword search 10.6 s → 53 ms; ~15–21 ms vector retrieval.
- Built the data acquisition and enrichment engine (0% → 99.5% coverage); fixed a notification pipeline failing 100% of deliveries.

SELECTED PROJECTS

JustHireMe / Creator / Open source

Tauri / Rust / React / Python / FastAPI

- Built a local-first job-intelligence desktop app; 2,249★ open source.
- Shipped 102 releases with 620 backend tests; the launch reached 380K views.

Svara / Open source / On-device dictation

Python / faster-whisper / CUDA

- On-device dictation: 8.33% WER on CPU; 754 ms to first word.

Fintech P&L platform / Freelance / Confidential client

- Built solo in 18 days with 5 payment/commerce integrations.
- Delivered ~4,500× faster attribution and recovered 641 orphaned orders.

TECHNICAL SKILLS

Languages & applications: Python, TypeScript, JavaScript, SQL, React, Next.js, FastAPI, Node.js

AI & data: Machine learning, large language models (LLMs), retrieval-augmented generation (RAG), LangGraph, embeddings, vector search, voice AI, PostgreSQL, MongoDB

Engineering: Docker, AWS, GitHub Actions, CI/CD, automated testing, AI evaluations, Git, REST APIs

EDUCATION & RECOGNITION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Lovely Professional University, Punjab / 2023 - 2027 (expected) / CGPA: 8.59

Smart India Hackathon 2025 semifinalist (PolySEE team). Oracle OCI AI Foundations Associate; NPTEL coursework in Deep Learning and Machine Learning. Open-source contributions to kana-dojo, animated icons, and free-programming-books.
